

## Release Information Sheet

### Factoria „Revive“ & More Sleepless Nights“ EP

UK based producer and DJ **Dave Dowsett a.k.a. Factoria** is one of the hottest names at the moment in the international trance scene. His productions have appeared in the playlists of global players including Paul van Dyk, Armin van Buuren, Tiesto, Ferry Corsten and Above & Beyond. As a DJ Dave has rocked the crowd at the “Asta” in The Hague (Netherlands) and at the legendary “Passion” in the UK, for example. Beside many high class productions, the young Englishman has remixed acts like Matt Darey and Robert Nickson. Now he delivers a very special EP with two tracks that will definitely be top tunes of this summer!

The **Original Mix** is euphoric trance in the true meaning of the word. Starting with pumping beats, the clubbers will be released with a wonderful break and a melody that goes right into the brain even when you listen to it for the first time. This is a peak time burner that shows how beautiful trance music can be.

**Static Blue**, a very talented young producer from France (hit: Icone Meets Static Blue – “The Fall”), has made a remix, that can be described as pure melodic trance. It is a little bit softer and more dreamy than the Original Mix, but still works great in a club. This one fits best in a very uplifting set with its nice flow and warm bassline.

A more techy and progressive interpretation is the remix produced by **Dark Moon**, the masterminds of Breathe Music. These two german guys know how to put some energy on the dancefloor. Their remix starts with hard beats until the break, where the main melody is introduced, followed by hard beats again.

The second track of this fabulous EP is called **“More Sleepless Nights“**. Another uplifting masterpiece full of energy with a hypnotic melody and a massive buildup. This one will also be found in many playlists this summer.

### Reviews:

**Danny Slade for IDJ Magazine UK:**

Copious amounts of mixes here on this two tracker so hopefully something should take your fancy. Quite a few of them caught mine with my two favourites being the 'Revive' original and the 'More Sleepless Nights' original. Both remind me of the trance of about 7 years ago when producers weren't scared to put out tracks that quite simply made you smile! D.S. 4

**Steve Bolger for trance.nu:**

Each of the three mixes are very impressive. The progressive-minded Dark Moon remix is something very unique and special, and both the original and Static Blue remix are perfect for any synth-loving and uplifting enthusiast. "More Sleepless Nights" seems almost like a filler, but it has its moments as well. The Static Blue mix edges above the others in the end. 4/5

**Cetric für Raveline (Germany): „Release of the Month in July!“**

Der in UK ansässige Producer und DJ Dave Dowsett zählt derzeit mit seinem Sound zu den Topacts der Tranceliga. Innerhalb kürzester Zeit fand sich seine Doppel-A-Side „Revive“ / „More Sleepless Nights“ in den Playlists von Armin van Buuren, Paul van Dyk, Dave Pearce und Above & Beyond wieder. „Revive“ ist ein wunderschön melodieverspieltes Tranceanthem, das allein schon im Originalmix mit seinen endlosen Flächensounds und dem Pianobreak für Gänsehaut sorgt, die sich in den Remixen von Static Blue und Dark Moon noch verstärkter fortsetzt. Auch die Bonusnummer „More Sleepless Night“ ist Upliftingoberklasse, bei der man problemlos der Crowd ein durchgängiges Hands-Up abverlangen kann. Schade nur, dass hierzu noch keine weiteren Mixe existieren. 6 Points Citric
